

Import Data Dari Excel

1. Buatlah data di excel, misal :

NIM	NAMA	KELAS	NILAI
11111	AKU	MI	90
22222	DIA	SK	80
33333	KAMU	AK	70
44444	ENKKAU	TK	80
55555	SAYA	MA	75

2. Simpan dan tutup file excel
3. Buatlah project baru dengan sebuah form sebagai berikut :

- a. Button
 - b. Openfiledialog
 - c. Datagridview
4. Tulis coding di bawah ini

```
Imports System.Data.OleDb

Public Class importdariexcel
    Dim conn As OleDbConnection
    Dim da As OleDbDataAdapter
    Dim ds As New DataSet
    Dim cmd As OleDbCommand
```

```
Private Sub Button1_Click(ByVal sender As System.Object,  
ByVal e As System.EventArgs) Handles Button1.Click  
On Error Resume Next  
OpenFileDialog1.Filter =  
"(*.xls)|*.xls|(*.xlsx)|*.xlsx|All files (*.*)|*.*"  
OpenFileDialog1.ShowDialog()  
  
conn = New  
OleDbConnection("provider=Microsoft.Jet.OLEDB.4.0;" & _  
"data source='" & OpenFileDialog1.FileName &  
"';Extended Properties=Excel 8.0;")  
  
da = New OleDbDataAdapter("select * from [Sheet1$]",  
conn)  
conn.Open()  
ds.Clear()  
da.Fill(ds)  
DGV.DataSource = ds.Tables(0)  
conn.Close()  
End Sub  
End Class
```
