Hal - 1 -

Membuat Program Backup Database

Program ini cukup penting sebagai sarana Backup Data, walaupun Windows Explorer mampu melakukannya, tidak ada salahnya jika kita coba membuat programnya dalam Visual Basic.

Listing Program

```
Private Declare Function SHFileOperation Lib "Shell32.dll"  
Alias "SHFileOperationA" (lpFileOP As shfileopstruct) As  
Long  
Private Const FO_copy = &H2  
Private Const fof_allowundo = &H40  
  
Private Type shfileopstruct  
    hwnd As Long  
    wfunc As Long  
    pfrom As String  
    pto As String  
    Fflags As Integer  
    Faborted As Boolean  
    hnamemaps As Long  
    sprogress As String  
End Type  
  
Public Sub copy(ByVal asal As String, ByVal tujuan As  
String)
```

Hal - 2 -

```
Dim x As shfileopstruct
  With x
    .hwnd = 0
    .wfunc = FO_copy
    .pfrom = asal & vbNullChar & vbNullChar
    .pto = tujuan & vbNullChar & vbNullChar
    .Fflags = fof_allowundo
  End With
  SHFileOperation x
End Sub

Private Sub Form_Load()
  Dir1.Path = "C:\Program Pelengkap"
  Dir2.Path = "C:\"
End Sub

Private Sub Command1_Click()
  On Error Resume Next
  If Text1 = "" Then
    MsgBox "Anda belum memilih file yang akan dicopy"
    Exit Sub
  ElseIf Text2 = "" Then
    MsgBox "Anda tidak memilih direktori tujuan peng-Copy-  
an"
    Exit Sub
  End If
  copy Text1.Text, Text2.Text
  MsgBox "File sudah di copy"
End Sub

Private Sub Command1_KeyPress(Keyascii As Integer)
  If Keyascii = 27 Then Unload Me
End Sub

Private Sub Drive1_Change()
  Dir1.Path = Drive1.Drive
End Sub

Private Sub Drive2_Change()
  Dir2.Path = Drive2.Drive
End Sub

Private Sub Dir1_Change()
  File1.Path = Dir1.Path
```

Oleh : Uus Rusmawan
Hal - 3 -

```
End Sub
```

```
Private Sub Dir2_Change()  
Text2.Text = Dir2.Path  
End Sub
```

```
Private Sub File1_Click()  
Text1.Text = File1.Path & "\" & File1.FileName  
End Sub
```
